

Climate Run: Iceland

240 km | 3 days

REBOUND & RESILIENCE

Mansfield Nordic Annual Meeting
Saturday, November 7th
Underhill Town Hall
Underhill, VT

Join Vermont ultrarunner, coach, and teacher Pavel Cenkl for stunning images and stories from Climate Run: Iceland — a solo run across Iceland from the Atlantic to the Arctic Ocean covering 240 kilometers and more than 6,000 meters of elevation gain. Learn about Iceland's unique landscape, its connection to climate change, and the lessons we can all learn from endurance sports about ourselves and the world we live in.

It is at the limits of ourselves that we come closest to the world.

And this is a world that needs us.

Now.
